on every push					
EXPERIENCE					
APR 2026 TO PRESENT		Founding Software Engineer LumaIQ · Houston, TX (remote) - Built LumaIQ alone, concept through production: Next.js App Router on Vercel, TypeScript, Supabase Postgres with row-level security as the tenant boundary. - Shipped the desks a management system leaves out: rate increases, delinquency and lien, owner reports, month-end close, audits and field ops. - Anthropic and OpenAI models drive the document and decision workflows; the suite runs on every push and fails the build when a rule breaks.			
AUG 2025 TO APR 2026		Area Manager The Jenkins Organization · Houston, TX, and Temple and Killeen, TX - Reported to the district manager and the VP of Operations; carried what the store teams needed from the office and what the office needed from the field. - REVENUE Rate strategy, existing-customer rate increases, occupancy and pricing across both markets. - RISK Delinquency, lien compliance, auctions, audits and inspections. - REPORTING Month-end close, owner reports, and the BI the reviews ran on. - PEOPLE Store-team hiring, training, scheduling and coaching across both markets.			
OCT 2024 TO PRESENT		Property Manager, then Assistant Manager The Jenkins Organization · Houston, TX · Part-time since June 2026 Ran a single property end to end: leasing, collections, and the books.			
SKILLS					
LANGUAGES AND FRAMEWORKS		TypeScript, React, Next.js App Router, Node, Tailwind CSS			
DATA AND INFRASTRUCTURE		Supabase Postgres, Vercel, BI reporting			
AI		Anthropic, OpenAI			
DOMAIN		Self-storage operations, Revenue management, Lien compliance, Month-end close
